PROBLEM STATEMENT

Problem

Many individuals, especially in rural or digitally underserved communities, face challenges understanding UPI, online banking, loan procedures, and scam prevention. Limited awareness can lead to financial mismanagement, fraud risks, and exclusion from government schemes.

Proposed Solution

An AI-powered Financial Literacy Agent using NLP and Retrieval-Augmented Generation (RAG) to explain digital transactions, budgeting, loans, and scam prevention with responses grounded in trusted documents.

TECHNOLOGY USED

- IBM Cloud Lite Services
- IBM watsonx.ai Studio
- IBM Granite Foundation Model (LLM)
- Natural Language Processing (NLP)
- IBM Watson Discovery — document search and retrieval
- Retrieval-Augmented Generation (RAG)

IBM CLOUD SERVICES USED

- IBM Cloud watsonx.ai Studio
- IBM Cloud watsonx.ai Runtime
- IBM Granite Foundation Model
- IBM Cloud Object Storage
- IBM Cloud IAM (Identity and Access Management)
- IBM Watson Discovery

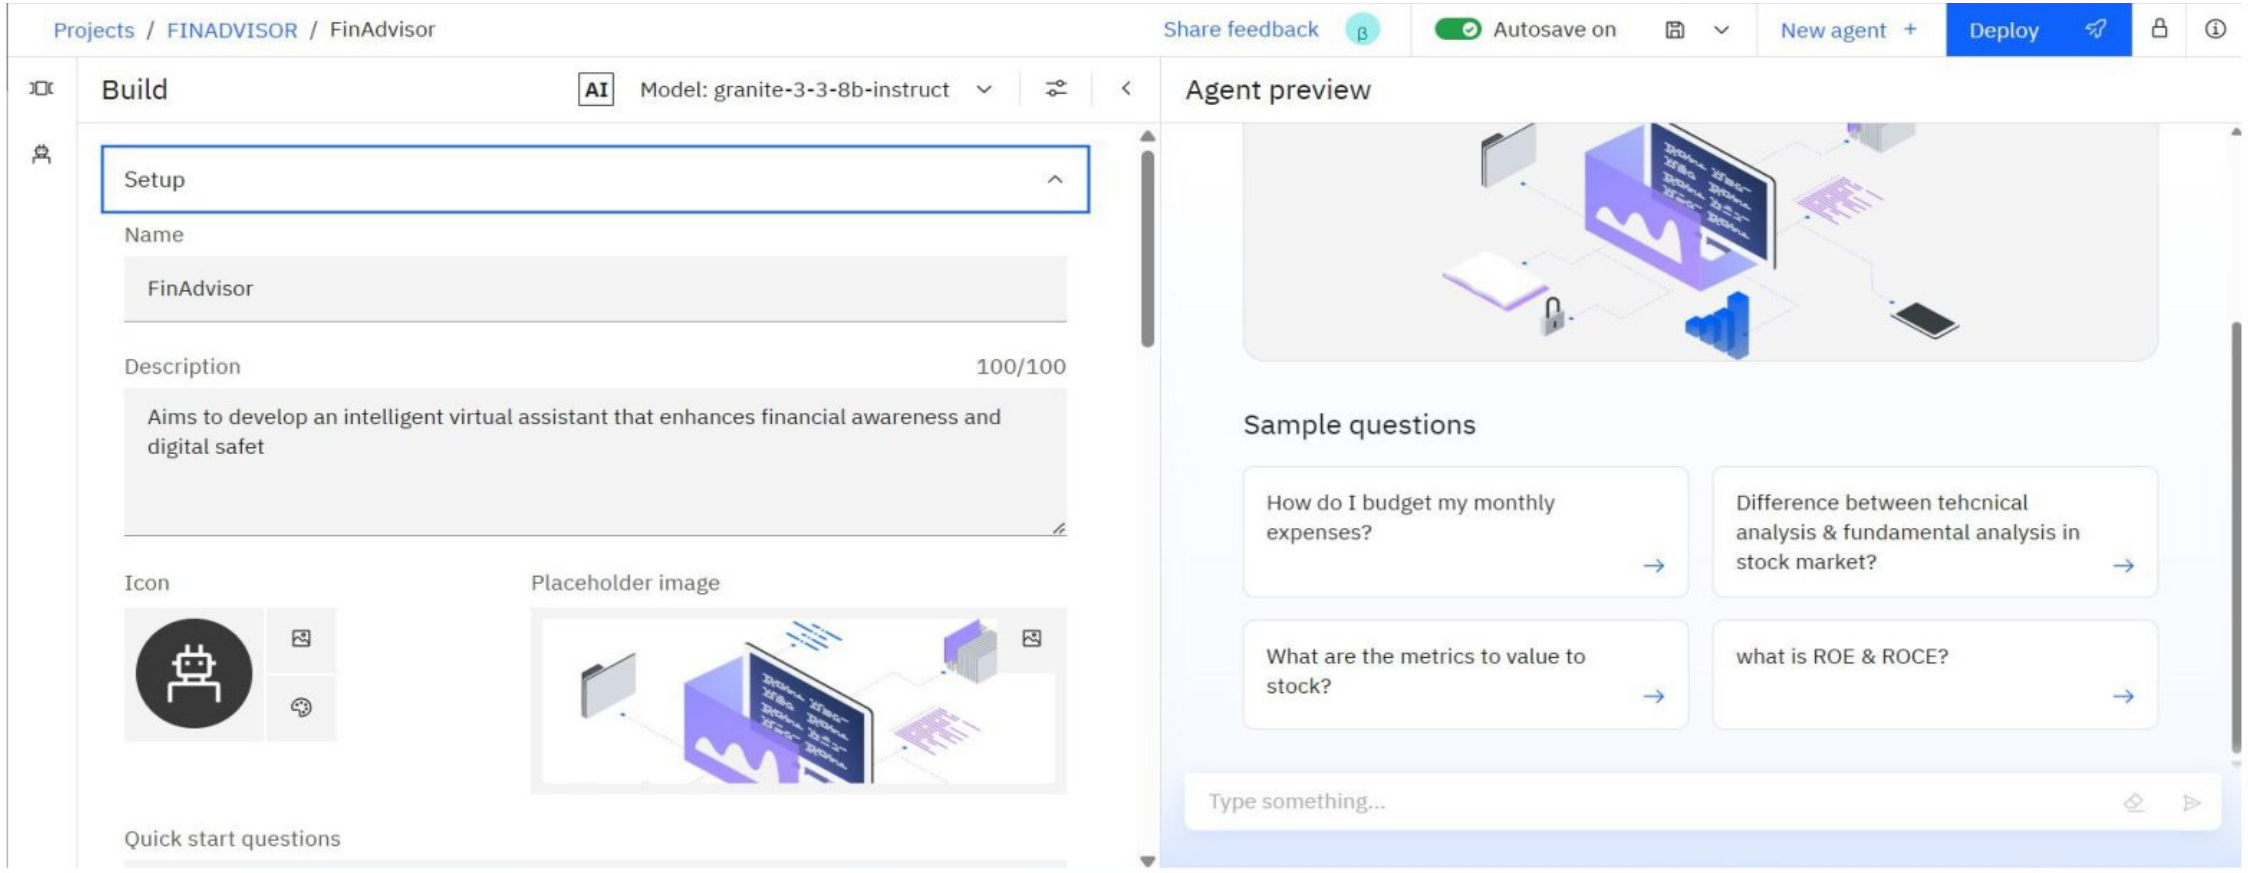

WOW FACTORS

- Empowers users with accessible and personalized financial knowledge
- Supports better financial decisions and trust in digital financial systems
- Retrieval-based answers from trusted sources such as RBI and NPCI
- NLP for understanding diverse user questions
- Document-based responses using IBM Watson Discovery for retrieval (RAG)
- Safe handling of unrelated questions; multilingual interaction
- Covers UPI, online scams, loans, budgeting, and savings

END USERS

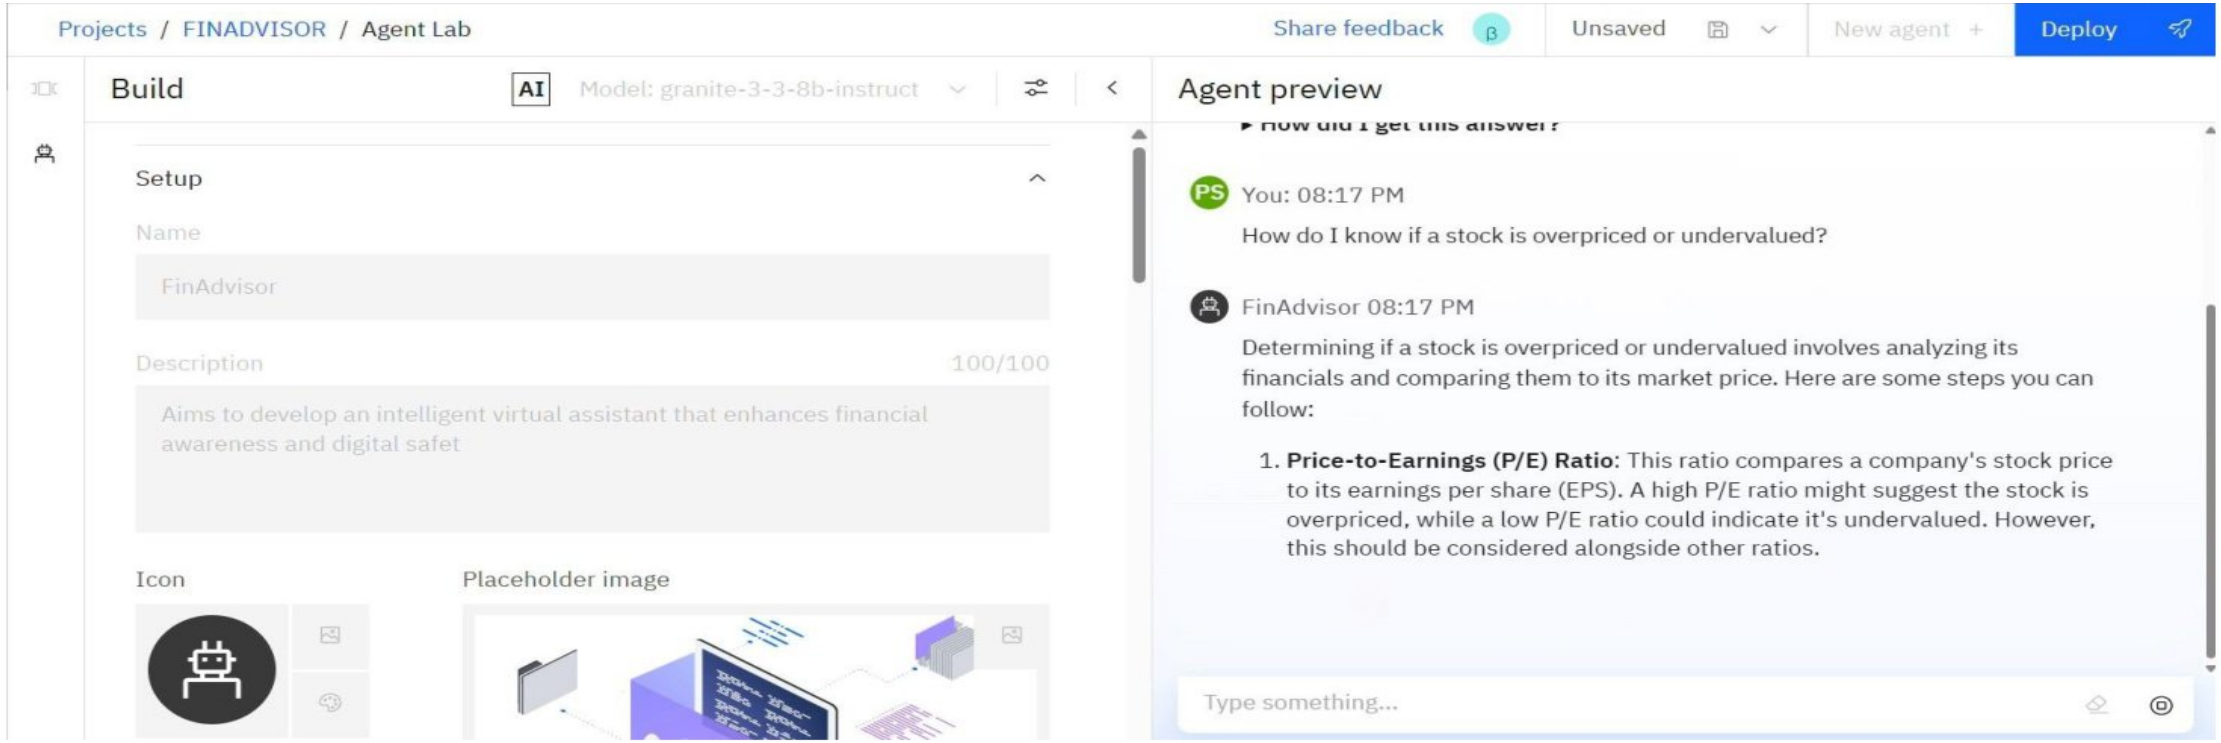

- General public and first-time digital users
- Elderly citizens
- Students and young adults
- NGOs and government outreach programs
- Self-help groups / women’s collectives
- Educators and institutions
- Microfinance beneficiaries

CONCLUSION

- Uses IBM watsonx.ai and RAG to provide accessible, context-aware financial guidance
- Addresses UPI safety, loan awareness, budgeting, and scam prevention
- Document-backed answers support inclusivity, trust, and reliability
- Can help bridge the digital divide and promote financial well-being

FUTURE SCOPE

- Multilingual support for regional users
- Voice-activated financial literacy assistant
- Real-time collaboration and guided learning
- Personalized budgeting and savings education
- Integration with trusted financial and government resources
- Expanded coverage of digital payments and fraud prevention

THANK YOU
